

ARU SHARMA

[linkedin](#) | arusharmazxx000@gmail.com | [personal-page](#)

EDUCATION

Panjab University

Bachelor of Engineering in Information Technology

Chandigarh, India

Oct, 2022 – May, 2026

Little Scholars

Mathematics and Computer Science; (Central Board of Secondary Education); 95%

Kashipur, India

May 2019 – Jun 2021

EXPERIENCE

Founding ML Engineer

Nannie.ai

Sep 2025 – Present

Remote (UK)

- Tested and deployed vision models based on **DINO** and **JEPA** architectures for various use cases, improving accuracy by 90% and making workflows 2x efficient.
- Benchmarked vLLM, SGLang, and llama.cpp; selected the config that sustained **95% GPU** utilization and throughput.

AI Engineer (Contract)

Deskree Inc.

Nov 2025 – Jan 2026

Remote (Canada)

- Worked on Tetrix CLI, a developer tool for architecture review, **security and code quality** enforcement.
- Improved engineering workflows by integrating automated code review and reducing manual review overhead for infrastructure changes.

OSS Developer at Google Summer of Code

Mifos Initiative

Jun 2025 – Sep 2025

Remote (WA)

- Built a **multi-agent AI assistant** to automate queries around Jira ticket status and retrieve contextual answers from Slack discussions, improving internal developer support workflows.
- Integrated retrieval-based workflows for organizational knowledge access, enabling faster issue tracking and communication lookup across engineering channels.

OSS Developer at Summer of Bitcoin

Bitcoin-dev-project

May 2025 – Aug 2025

Remote (NY)

- Engineered **AI-native pipelines** for Bitcoin knowledge ingestion from conference talks, supporting transcription cleanup, summarization, and structured data extraction..
- Reduced manual annotation overhead in review and correction workflows by **80%**, improving overall throughput.

Software Engineering Intern

CNCF WasmEdge

Sep 2024 – Dec 2024

Remote (TX)

- Developed a **RAG-based code assistant** chatbot powered by open-source LLMs and deployed with the **WasmEdge runtime** for lightweight, local inference.
- Improved developer access to repository knowledge through context-aware code assistance and retrieval workflows.

PUBLICATIONS

Robust Speech Emotion Recognition Across Diverse Datasets: A Comparative Study of Deep Learning and Transformer-Based Approaches for VoIP Applications(16th ICCCNT 2025)

PROJECTS

Memory-Augmented-Agents | Long Horizon Reasoning, Memory Routers

- Built a chatbot designed with long-term memory capabilities to make them personalised and adaptive.
- Leverages a semantic, keyword and reranking mechanism for intelligent retrieval and a sophisticated mechanism for continuous memory consolidation.

Open-Paxel | Code Analysis, AI native tooling

- Built a lightweight toolkit to analyse coding sessions from claude code using LLMs and Sqlite.
- It keeps the private data on the local machine and create a profile suggesting user's strengths, areas of growth and overall narrative.

ACHIEVEMENTS

- Ranked 15 globally on the **NTIRE Image Dehazing and Denoising challenge** at **CVPR 2024**.
